Cập nhật mới nhất 15 Th7, 2021 0 Home Designer Professional là một phần mềm CAD trực quan cho phép bạn tạo và chỉnh sửa sơ đồ để sửa đổi thiết kế trong môi trường thân thiện với người dùng. Home Designer Pro có các công cụ phong phú và dễ sử dụng phù hợp cho tất cả các loại dự án lập mô hình, từ thiết kế tu sửa để xây dựng một ngôi nhà

mới từ đầu. Chương trình cung cấp các công cụ thiết kế thông minh và tiên tiến để tạo ra các bản vẽ chi tiết cho thiết kế nhà, t của bạn với các công cụ thiết kế tiến tiến và xây dựng thông minh. Cho dù bạn đang tạo toàn bộ ngôi nhà, phòng, cảnh quan, đồ nội thất, tranh vẽ và các chi tiết thiết kế khác có thể được hình dung chính xác. Nó bao gồm một loạt các công cụ để nhanh chóng và dễ dàng tạo ra nhiều phong cách, hình dạng, kích cỡ, màu sắc, bàn và các công cụ khác để tạo bản vẽ chi tiết xấy dựng. Các tính năng chính của Home Designer Pro 2022 : Thiết kế nhà, tu sửa và ước tính Thiết kế tiên tiến và các công cụ xây dựng thông minh Đễ thiết kế và tạo mô hình 3D một cách dễ dàng Bản vẽ thi công và công cụ thiết kế Thông tin chi tiết về từng nhà máy Tự động đóng khung và ước tính Phân tích chi tiết với các tùy chọn báo cáo Và nhiều hơn nữa. Yêu cầu hệ thống tối thiểu Windows 7/8 / 8.1 / 10 (chỉ 64 bit - tất cả các phiên bản) Bộ xử lý đa nhân 2.0 GHz RAM 4 GB (bộ nhớ) Dung lượng ổ cứng trống 5 GB VRAM 512 MB Tải và giải nén tệp với pass: thichvn.com Mở và cài đặt phần mềm Thoát cài đặt khi hoàn thành Copy file trong thư mục Crack vào thư mục Crack vào thư mục cài đặt Hoàn thành! Tiêu đề: Home Designer Professional 2022 v23.1.0.38 Phát triển: Chief Architect Bản quyền: Full Cờ rắc OS: Windows Kích thước tệp: 283 MB Download (Pass giải nén: thichvn.com) Download Link Vui lòng sử dụng Winrar để giải nén tệp tin Link Google lỗi quá tải người dùng, vui lòng đăng nhập tài khoản google của bạn để tải file hoặc tải Link Dự phòng Vui lòng để lại bình luận để site thêm phong phú và cố gắng phát triển nhệ 1) File Keygen và Crack hay bị trình diệt Virus nhận nhằm là Vius. Do vậy bạn tạm thời ngắt kết nối internet và trình diệt virus trong quá trình cài đặt phần mềm 2) Nên chạy File Crack "Patch" và "Keygen" bằng quyền "Run as administrator". Khi sử dụng Key cho phần mềm cần chú ý để việc chặn phần mềm bằng Firewall để License Key hoạt động tốt. 3) Một số phần mềm và Game Yêu cầu NET Framework và DirectX mới nhất mới chạy được. Hãy kiểm tra lại trên máy tính của bạn và cài đặt nếu chưa có. 1. Vào "Control Panel" -> Chọn "System and Security" -> Rồi tìm "Windows Defender Firewall". (Hoặc bạn có thể search "Windows Defender Firewall" ngay góc trái bên dưới thanh Taskbar) 2. Chọn "Advanced settings" 3. Chọn "Inbound rules" list danh sách các phần mềm sẽ xuất hiện 4. Nếu chương trình bạn cần block có trong list rồi thì bạn chuột phải vào tên chương trình rồi chọn "Properties" sẽ xuất hiện -> chọn "block..." rồi "apply" và "ok". Xong 5. Hoàn thành. 6. Nếu chương trình cần block không có trong list thì bạn chọn "Program" và Click Next 8. Ở mục "Program" Tìm đường dẫn đến file exe của chương trình cần block (ở ổ C hoặc short cut ngoài desktop): và Click Next 9. Ở mục "Action" Chọn "Block the connection" để ngặn chặn việc kết nối internet và Click Next 10. Chọn "Next" để tiếp tục 11. Đặt tên cho phần mềm bạn block. Download Home Designer Professional 2022 v23 miễn phí - Phần mềm thiết kế nhà chuyển nghiệp dành cho những người đam mê thiết kế nhà chuyên nghiệp dành cho những người đam mê thiết kế nhà, tu sửa, thiết kế nội thất, sống ngoài trời và ước tính chi phí. Home Designer Pro cũng cấp thiết kế tiên tiến và các công cụ xây dựng thông minh để tạo ra các bản về xây dựng chi tiết. Home Designer Professional - Thiết kế nhà ở, công trình Home Designer Professional - Thiết kế nhà ở, công trình Home Designer là phần mềm Chief Architect làm sản phẩm phần mềm thiết kế nhà được lựa chọn để tạo ra ngôi nhà mơ ước của họ. Thiết kế nhà chuyên nghiệp, thiết kế nhà chuyên n chấp nhận mặc định cho hầu hết các thực hành xây dựng để hỗ trợ bạn trong các dự án thiết kế nhà của bạn. Tạo các sơ đồ tầng được chia tỷ lệ chính xác, tự động tạo mộ hình 3D. Thiết kế & mô hình nhà 3D Cho dù bạn đang tạo một phòng đơn hay toàn bộ ngôi nhà, Home Designer sẽ tự động tạo mô hình 3D sau khi bạn vẽ các bức tường của các đối tượng thiết kế thông minh, như tủ, để nhanh chóng và dễ dàng tạo ra nhiều kiểu dáng, hình dạng và kích cỡ khác nhau. Tạo bất kỳ phong cách chọn màu sắc, mặt bàn, kiểu cửa, nhà bếp, đúc vương miện và phần cứng. Bản vẽ xây dựng & Công cụ CAD Home Designer có một công cụ phần mềm CAD mạnh mẽ từ Kiến trúc sư trưởng bao gồm một loạt các công cụ. Sử dụng các công cụ CAD với Sơ đồ tầng, Mặt cắt ngang và Chế độ xem Độ cao để chi tiết bản vẽ xây dựng, sau đó ước tính và xây dựng các công cụ tự động để tạo kế hoạch trang web, cảnh quan, sàn và sân. Có hơn 3.600 nhà máy với thông tin chi tiết về từng nhà máy bao gồm Bản đồ Khu vực Độ cứng tích hợp. Công cụ boong bao gồm khung boong tự động và danh sách vật liệu để ước tính. Create relevant details of the interior or exterior of your design for precise plan editing. Advanced

Dimensioning Tools Includes angular and point-to-point dimensioning tools. Adjust your settings to quickly dimension to specific objects and locations. Save Snapshot Materials Lists Save snapshots of your materials list at different stages of the project to evaluate and compare cost differences. Add detail to each individual component and then store it to your master list for use in future projects. Convert Polyline Tool Create 3D objects (such as countertops, slabs, terrain features, and more) from 2D CAD shapes. Custom Watermarks Create watermarks and display them on your work. Control location, size, angle, and transparency. Add images to your watermark, such as your company logo for better branding. North Pointer for Sun Angles Create sun angles with accurate longitude, latitude, date, and time; use the North pointer as a bearing for the sun angles with accurate longitude, latitude, date, and time; use the North pointer as a bearing for the sun angles with accurate longitude, latitude, date, and time; use the North pointer as a bearing for the sun angles with accurate longitude, latitude, date, and time; use the North pointer as a bearing for the sun angles with accurate longitude, latitude, date, and time; use the North pointer for Sun Angles Create sun angles with accurate longitude, latitude, date, and time; use the North pointer as a bearing for the sun angles with accurate longitude, latitude, date, and time; use the North pointer as a bearing for the sun angles with accurate longitude, latitude, date, and time; use the North pointer as a bearing for the sun angles with accurate longitude, latitude, date, and time; use the North pointer as a bearing for the sun angles with accurate longitude, latitude, date, and time; use the North pointer as a bearing for the sun angles with accurate longitude, latitude, date, and time; use the North pointer as a bearing for the sun angles with accurate longitude, latitude, date, and time; use the North pointer as a bearing for the sun angles with accurate longitude, latitude, and the latitude is a sun angle with a contract longitude is a sun angl including lot boundary, setback requirements, and other information for your local building requirements. We purchased Home Designer Pro so our expert reviewer could thoroughly test and assess it. Keep reading for our full product review. The first thing to understand about Home Designer Pro by Chief Architect is that it's the combination of all of the features and tools found in the Home Designer line of home, interior, and landscaping design programs. It has everything from floor plans and interior design tools to topography designers and plant encyclopedias. There's literally nothing about your home's physical manifestation that can't be put into this program. A program this comprehensive is massive and takes a significant commitment in time and effort to learn how to use effectively. However, just know you have a long road ahead—albeit fun one; if designing your dream home down to the last detail is what you want. Lifewire / Jeffrey Daniel Chadwick When you open a new design with Home Designer Pro, you're greeted with a blank sheet of grid paper and several rows and columns of tools. If this is you're also one of those people who like to jump into software like this without reading the instructions, you won't flounder around too long. A simple survey of the tool ribbon gives you a pretty general idea of what everything does. Finding your way around the software becomes easier the longer you experiment with it. Learning this software often feels like the experience of learning a new video game. If you enjoy building digital homes in a game like The Sims, this program will probably come very naturally to you. Almost all the tools you'll use regularly are accessible from the main window, it never takes more than a couple of clicks to do it. This gives the designing process a very streamlined feel, and once you're in the flow, creating plans comes quite naturally. If you enjoy building digital homes in a game like The Sims, this program will probably come very naturally to you. Additionally, granular tools for each object on the plan can be accessed by right-clicking on them. This makes it easy to change the properties of a wall, center a door or staircase, and calculate materials needed to build a particular room. Making useful options available while keeping your plan front-and-center is one of the things Chief Architect does best. There are several ways to see what your design will look like in progress. You can switch between the traditional 2D bird-eye view, to a gabled 3D look that will give you a more realistic picture of what it will look like when built. Additionally, you can pick a dollhouse view, so you can see the interior as well as the exterior. There's also a framing view, which just shows the design's wooden skeleton. The program even has the ability to create a walk-through video, to show you exactly what walking from your kitchen to your bedroom would look like. As you create your design, the program automatically keeps a list of all the materials reports on rooms, floors, or the entire plan. These material lists not only break down all the physical stuff you'll need but also estimate how much it's going to cost. This is an invaluable tool that helps keep your project in its scope. However, you should always treat the cost estimate as just that, an estimate doesn't include connector units like nails and staples. And most importantly, the estimate doesn't incorporate the cost of labor. These are important conversations to have with your contractor. There's a lot of knowledge and craft that went behind making these tools. And although Chief Architect does a great job at making them as intuitive as possible, it takes time and commitment to learn to use them proficiently. To that end, Chief Architect products in particular, you'd be well-served to watch all of them in their entirety. The company also offers free training webinars for customers for further instruction. Lifewire / Jeffrey Daniel Chadwick Installation is simple, so long as Chief Architect delivers the correct software as an online download or have a physical USB flash drive delivered to you. When we received our flash drive, we installed the software, but the included product key didn't work. We discovered that the company sent us their Home Designer Pro. We tried contacting customer service, but they were closed on the weekend. So, rather than wait for a new USB to be shipped, we downloaded a free trial version of the Home Designer Pro and used the product key we had to activate it. It wasn't a massive obstacle for us to overcome. But a user that doesn't know that kind of trick would have been stuck waiting at least a few days for the correct product to arrive. However, once we got the right software installed and put the key in, setup was a breeze. Standard install takes less than five minutes to complete. When we tested Home Designer Pro, one of our favorite tools was the Space Planning Assistant. When launched, it walks you through a step-by-step wizard that asks basic questions like how many floors, bedrooms, bathrooms, etc., you want in your design. It also asks for things like porches, decks, and laundry rooms, When you're done, the program puts down all your rooms into your plans, making it easy for you to drag and drop where you want each to go. It's a great way to get an initial floor plan going. One of the most convenient interior designed for specific room types. So, if you need some inspiration or a jumping-off point for a kitchen, bedroom, bathroom, and more, you can download the grouping you like and drop it. Everything is easily moved around a furniture grouping you like. You can generate needed materials reports on rooms, floors, or the entire plan. These material lists not only break down all the physical stuff you'll need, but also estimate how much it's going to cost. Chief Architect makes it easy to get some inspiration from their library of sample plans. There are dozens of completed designs on Chief Architect's website —and more are added every year. These plans range from designs for tiny houses and modest bungalows to million-dollar mansion homes. And they're entirely and easily edited and customized - a great option for people who don't need to build everything from the ground up. Part of what makes Home Designer Pro worth its price tag is the intricate level of detail you can apply to your plans. The cabinet designer tools are a prime example of this. These aren't just placeholder graphics—they're your future cabinets down to the last detail. Not only can you designate their size and place, but also drill down to precise dimensions such as countertop thickness and overhang, as well as backsplash height and toe kick depth. You even get full control over box construction, so you can set details such as whether the box is framed or frameless, and set door and drawer overlays. It's hard to find this level of detail in any other consumer-level home design software. To furnish your new home design, Home Designer Pro comes loaded with object libraries for furniture, accessories, electronics, appliances, lightings and various other household items. Home Designer Pro's main object library with more than 46,000 brand-name products that you can download. You also have the ability to craft your own custom products and import specialized objects from other sources. So, there's effectively no limit on how detailed your plan can be. When you pay \$500 for a home designer program, you should expect it to have everything. Home Designer program, you should expect it to have everything. Home Designer program, you should expect it to have everything. and roofs. Each of these design modules could occupy a whole review unto themselves. Suffice it to say that when used effectively, you can use them to tailor high-quality elements that are detailed, precise, and unique to your design. Lifewire / Jeffrey Daniel Chadwick Planning the interior of your new home is just half the story with Home Designer Pro. This program enables you to design all the ground on your property. It has great landscaping tools that allow you to customize your terrain, put in slopes, hills, and other elevation points. It also has a massive plant library so you can not only recreate what's already on your property but also experiment with other plants that you may want to add. This home design software even comes complete with a sprinkler designer. This software also features a growth slider, so you'll be able to see what those plants will look like years from now. One of the most useful outdoor tools in Home Designer Pro is the Plant Encyclopedia & Plant Chooser. This allows you to search for plants that are best suited to your corner of the planet. It even features a growth slider, so you'll be able to see what those plants will look like years from now. The encyclopedia is augmented by a library of thousands of plant objects that you can place in your design. Despite its hefty nature, Home Designer Pro should function smoothly on nearly any computer bought in the last few years. We tested ours on a 2015 iMac with a 1.4GHz processor and 8GB of RAM. Those aren't impressive specs by today's standards, but they're not awful either. Throughout our days of testing, we never had a single problem with the program stalling or failing to launch, and we never experienced any hiccup that would keep us from designing. At \$500, Home Designer Pro is a hefty investment. That's because it includes everything Chief Architect has two lowerpriced products that might suit your budget a bit better. Home Designer Suite only costs \$99, and Home Designer Architectural, just \$199. These versions are pared down, but you'll lose access to more granular tools and have fewer items in your object library to use in your designs. Both are worthy alternatives to Home Designer Pro. Home Designer Pro really has no peer when it comes to consumer-level home design software. That's part of what makes it so expensive. If your budget doesn't make room for a \$500 piece of software, Total3D Home, Landscape and Deck Suite 12 is a fine option. And costs a fraction of Home Designer Pro. You won't get all the detail and raw power as Home Designer Pro, but you're the most enthusiasts, it will likely suit your creative needs just fine. Final Verdict A peerless home design software with an incredible level of detail and control. Home Designer Pro is the software you buy when you're really serious about planning your new home down to its smallest details. It has everything, All the things your home has, or potentially could have, are included in this software. You're only limited by your imagination and time commitment.
